5 Powers Seek New Avenues Toward Peace

(By Associated Press in Calgary Herald.)

New York, Oct. 28.—Five world powers, Great Britain, France, Russia, United States and Japan were breaking trail Friday toward new alignments intended to promote peace and security.

As reflected in Canadian and Associated Press dispatches from several city capitals, their activity introduced three powerful factors in the international problem. These factors were:

1. Improved relations between Russia and Japan despite the troublesome Manchuria that lies between them.

2. The proximity of a treaty of non-aggression between France and Russia stipulating that France will give no aid to a country attacking Russia, and vice versa.

3. Apparent Anglo-American unity at Geneva, implying that the world's two largest naval powers have reached an agreement in principle to harmonize their views on disarmament.

Moscow reports told of better relations between Japan and Russia, especially affecting their mutual trouble spot, Manchuria.

Stress Need of Reducing the Wheat Acreage.

(By Lukin Johnston in the Calgary Herald.)

London, Oct. 28.—World wheat prices will recover only when international trade channels are cleared so that new markets can be opened up for consumption, or when acreage is reduced in all great exporting countries. Such is the view in trade and financial circles in London today in response to a record drop in prices recorded in Winnipeg and Chicago.

Those most closely in touch in this country with the wheat situation believe that altogether too much wheat has been grown of late years, and in proof of their opinion cite the fact that five non-European wheat countries now produce two billion bushels against one and a half million bushels before the war.

Furthermore, Europe itself, which formerly produced half of the world's needs, has now almost regained its former output. Such increased production can have only one result, fall in values, and this has been intensified by tariffs and other restrictions, and by holding back of supplies, thus constituting abnormal interference with supply and demand.

Outstanding Violinist Will Establish Class in Chinook

Mr. E. A. Kirkwood, teacher of violin, was in Chinook last week to make arrangements for forming a class here. It is Mr. Kirkwood's intention to be in Chinook every week to teach music, which will afford a splendid opportunity for all those who are interested in violin.

Mr. Kirkwood comes highly recommended, having been a teacher of violin in the Toronto Conservatory of Music, as well as being a member of the Toronto Symphony Orchestra.

Mr. Kirkwood was a pupil of the late Dr. Von Kunitz, leader of the Toronto Symphony Orchestra, and has also studied under Geza de Kresz, leader of the Hart House String Quartette. Chinook will be most fortunate in having such an outstanding violinist here.

Fragrance Sealed In Metal

**"SALADA"
TEA****"Fresh from the Gardens"****Lest We Forget.**

Fourteen years have come and gone since that momentous eleventh hour of the eleventh day, of the eleventh month of 1918, when the armistice which ended hostilities in the greatest war in the history of mankind became effective. Once again the people of Canada observe "Remembrance Day," a day on which they pay tribute to the memory of the thousands of their fellow citizens, men and women, who gave their lives in a cause which to them, and to us who survive, was a sacred, a noble cause, namely, a war to end war.

But as we look back over those fourteen years, and as we view the state of the world today, we are perplexed and we seek an answer to the question: Has war, after all, been ended? We are disturbed and suffer disquietude as we contemplate the present world situation. Were the sacrifices of 1914-1918 all in vain? Is something worse to follow?

The nations of the world have not disarmed; quite the reverse is true. Armaments are greater and more deadly today than they were in July, 1914. There have been numerous attempts to reduce armaments, but none to date, with the exception of the League of Nations, and the attempts at reduction have been feeble and for the most part ineffective.

Under the terms of the Peace Treaty Germany was disarmed, and her allies reduced to a position of impotence for the time being. But in disarming Germany, the Allies tacitly agreed to bring about world disarmament. They have failed to do so, and now Germany is insisting on one of two things, either that the Allies proceed to disarm or that Germany be permitted to re-arm. The German demand is a reasonable one. The Allies cannot expect to hold a great, proud and powerful people in the position which the German people are forced to occupy at the present time.

What is to be the outcome? Will the Allies at last make a real, a determined, an honest attempt to disarm? If they do not, they will either have to agree to the re-arming of Germany, or that country will proceed to re-arm without their consent, and who will, or can, stop her?

But did the World War end war? As a matter of fact, it is not the war still in progress, but in another form which is bringing ruin upon all nations and imposing huge and incalculable losses and intense suffering upon millions of people? The weapons now employed are not bullets and bombs and bayonets, but extreme nationalist policies of many kinds—restrictive trade measures, prohibitive tariffs, trade quotas, immigration quotas, with each nation striving to promote its own interests by working some harm to other nations. Where do we find two nations working in cordial co-operation to advance, not only their own welfare but the welfare of each other, and the world at large? Rather, are not the nations engaged in waging war upon each other actuated solely by the motive of the survival of the fittest?

Narrow nationalism kept alive, and in turn keeping alive, racial and religious suspicions, passions and bitterness, rules today, with every nation excusing its own selfishness, its own narrowness and bigotry, on the ground that other nations started it, are worse than they are, and that they are merely providing needed self-protection for themselves.

So we find Russia, while teaching its farmers and workers how to build and use tractors, at the same time instructing them in the mechanism and operation of tanks for use in war. We find democracy overthrown in Italy and a war-like dictatorship set up. Fearing each other the countries of Europe adopt policies the result of which is ruin to the agriculturists of Canada, the United States, and all of the great food exporting countries of the world. The United States and France grab all the gold in the world and store it away in vaults indifferent to the fact that thereby they bring financial chaos upon the world. Each nation is out to kill the trade of all other nations, and they have succeeded to the extent that tens of millions of men and women are thrown out of work.

It is a disheartening picture, and no one nation seems to have the courage to set it, grapple with it, make a break in the vicious circle, and attempt to cut the cords which are throttling and strangling mankind. Instead, the old, threadbare excuse is given and acted upon—the other fellow is doing it, he is to blame, and I must follow suit or be submerged.

If this attitude is maintained much longer complete world collapse is inevitable. Conditions resulting are nothing but a hotbed in which anarchy thrives and grows apace. All the enemies of law and order, all the faddists with pet but unsound theories of their own, are preying upon the public in all countries, promising to create utopias if the people will only arise en masse and destroy everything now existing and which has been built up out of the labor, the experience, the sufferings of the generations of the past.

It is the whole system that is wrong, so these agitators declaim, but nothing is quite so wrong as such statements. It is not the system that is wrong, although like all systems it must constantly change and improve in an ever-changing world to meet conditions as they, too, change. No, the fault lies in the hearts and minds of people themselves. They still maintain their old suspicions and dislikes of each other; they hate any race and language but their own; they scorn any religion but their own; each nation suffers either from fear or a superiority complex because one or the other is the predominant trait of character of the individual men and women who make up the nation. It is the individual view which finds expression in purblind national policies.

Many of the politicians and statesmen of the world, the men chosen to direct national and international policies, realize the situation and left to themselves would be able to accomplish much to remedy it and remove the danger which is imminent, but their people will not support them; the masses would sweep them aside and put others in their place to continue to insist upon policies of extreme narrow nationalism. It is their own suffering they are thus determined to maintain, and their ultimate undoing which they will bring about, unthinkingly, heedlessly, and from purely selfish motives.

New Source Of Revenue

Entertaining saleswomen of London, England, combined pleasure with business this year by loading their cars with dresses and lingerie, which they sold to people in the rural districts during vacation trips. Two little girls who started on a tour through Yorkshire sold out their stock within a week.

Easy To Figure Out

"I suppose, like many other husbands you can't say what your wife pays for her hats and dresses." "Oh, yes, I can—too much." "But joking aside, how ever stopped to figure out how much your wife's clothes cost you?" "It isn't necessary. I simply add my income to what I owe."

All Her Children Were Troubled With Diarrhoea

Mr. J. J. Bickert, R.R. 1, Enslin, B.C., writes:— "Last Summer all my children were troubled with diarrhoea, and were so bad I did not know what to do. A friend told me to give them Dr. Fowler's Extract of Wild Strawberry, so I got a bottle, and after a couple of doses you should have seen the change. The children were soon well again, and I am very thankful to your wonderful remedy. I find it the only one that relieves so easily and quickly."

British Scientists Make Remarkable Discovery**Find Caterpillars Cause Of River Waters Turning Black**

A remarkable discovery was made by British scientists in the Eden bridge and Osted district of Kent and Surrey recently. Quite unaccountably, the waters in this area were rapidly being turned black, and it was alleged that pollution from sewage farms was the cause.

As a result, the department of botany of the British Museum was invited to probe the mystery. Samples of water were taken from the streams at various points and analyzed, when the sewage farms were exonerated, as the same ingredients were present both above and below the outfalls.

It was then noticed that paths and roadways alongside the streams, and overhanging by oak trees, were thickly covered with a sooty material consisting of partially digested leaves which had been devoured by millions of caterpillars of the green oak moth.

By a very odd coincidence this substance, washed down by natural drainage, had combined chemically with certain salts in the stream water, and the result was the manufacture of a natural ink.

This insect is quite capable of destroying an oak forest, but fortunately there is a natural check in the shape of a harmless fly known as the emps, or little hawk fly, which preys on the adult moths and is thus of immense value in saving thousands of pounds worth of native timber.—Tit-Bits.

World's Grain Show**British Empire Farmers' Co-Operative To Show At Regina**

The Empire Farmers' Co-Operative Limited, will be represented both by exhibit space and by delegates to the world's grain exhibition and conference opening at Regina in July next year, according to a cablegram received at headquarters' office of the exhibition and conference.

The Right Hon. Lord Strathclyde, chairman, who with two of the directors will attend as delegates, expressed the opinion that an excellent opportunity is thus provided to meet and confer with and to present the scope and advantages of the Empire Farmers' Co-Operative to farmers of all parts of the Empire. Exhibit space in the new grain show building has been booked for the organization.

This will be used for the presentation of such matters as may be of interest to farmers and for convenient distribution of literature.

Technical Education**Explains Delay In Giving Effect To The Vocational Act**

"Some delay has occurred in bringing the Vocational and Technical Education Act into effect by reason of the fact that the necessary regulations governing the act are still under consideration by the government," reads the communication explaining the status of this legislation from Hon. W. A. Gordon, Minister of Labor, tabled in the House of Commons. The letter was dated last March, and was in answer to protests from the Alberta School Trustees' Association against the delay in giving effect to this 1911 legislation.

Cost Of Direct Relief**Per Capita Cost In Regina Is Given As \$7.90**

The per capita cost of direct relief in Regina during the period from May, 1931, to April, 1932, for food, clothing and shelter, was \$7.90, according to information given recently by Hon. J. A. Merkle, Minister of Labor.

"This figure which represent an expenditure of \$420,566.53, does not include administration costs, drugs, medical attention or railway fares.

An Oil For All Men—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds and rheumatism, it is excellent. Therefore, it should have a place in all home medicine boxes and be amongst those taken on a journey.

Barley In Export Trade

Production Now Amounts To Nearly 150,000,000 Bushels A Year

The production of barley in Canada is rapidly increasing and now amounts to nearly 150,000,000 bushels a year. The principal uses for barley in the export market are: Feed for Livestock; Pot and Pearl Barley; Rolled Barley; Barley Flour and Barley Meal; Breakfast Foods; Malt Food Products; Malt Coffee and Barley Coffee; Malt Flour; Malt Extract; Fermented Alcoholic and Non-Alcoholic Beverages; Distilled Alcoholic Beverages and Solvents; Industrial Alcohol; Malted Stock Food; and Yeast.

A special study of the particular needs of that section of the market which the producer seeks to serve, is essential to the satisfactory development of the export trade.—Department of Agriculture, Ottawa.

Street Named After Canadian Captain**One Of Churchill's Thoroughfares Will Be Called Bernaler**

One of the streets of the new town-site to be opened at Churchill next spring has been named after a living Canadian, Captain J. E. Bernaler of Lewis, Que. He is the only Canadian now alive to be given this recognition in the building of Canada's new northern port on Hudson Bay. All the other streets have been named after explorers and navigators of the north lands long since departed.

Worms, by the irritation that they cause in the stomach and intestines, deprive infants of the nourishment that they should derive from food, and mal-nutrition is the result. Miller's Worm Powders destroy worms and correct the morbid conditions in the stomach and bowels that are favorable to worms, so that the full nutriment of the child is assured and development in every way encouraged.

Trinkets Belonging To Edgar Wallace Sold**Several Things In Collection Bought By Late Author's Wife**

A collection of jewelry which belonged to the late Edgar Wallace, novelist, brought in a total of \$1,250 in London. The sale was "by order of the receiver, Edgar Wallace administration." Mrs. Edgar Wallace bought several of the items for members of the family. An engraved gold cigarette case weighing about seven ounces brought \$175. A suite of each- along and diamond square sleeve links and two studs sold for \$400 and a platinum watch for \$105.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Have British Captains

Ninety per cent. of all Chinese ships have British captains and most of them are British registry with the union jack painted all over the side to warn pirates away.

Douglas' Egyptian Liniment is unrivaled for speedy relief in muscular rheumatism, lame back, inflammation, burns and felons.

Here's to the man who plans things—Builds things—makes things; Who prattles not of wonders of old Nor glows over ancestral gold; But takes off his coat and takes hold And does things?—

When you stop growing at both ends and start in the middle you are an adult.

W. N. U. 1068

Life Is Dedicated**To War Memorial****Book Of Remembrance To Be Illuminated By Montreal Man**

A five-year task of illuminating the Book of Remembrance which will contain the names of the 68,000 Canadian men and women who died overseas from August 1914 until the disbandment of the Canadian Expeditionary Force in 1922 is the life-work of William Purves, who exhibited a rough sample of the proposed Book in the McGill University Library here. The completed work will, be placed in a specially-built vault in the Peace Memorial Tower in the Parliament Buildings at Ottawa.

"The work I am now engaged on is my life-work," said Mr. Purves when interviewed. "If I live the next five years to finish the job I shall feel that my life has not been spent in vain."

The Book of Remembrance containing 450 leaves of the finest calf-skin vellum will be bound in purple Morocco leather, mounted on solid gold and engraved with the Canadian Coat of Arms. The 68,000 names will be inscribed by hand on the parchment work of several men, but 15 pages will be fully illuminated by Mr. Purves.

He intends to tell pictorially, year by year, the story of the war; for instance, the theme for 1914 will be the carrying of troops by the navy, for 1915, the pouring in of men from every province to aid their country, and so on. Mr. Purves also plans to work into his illuminated pages many authentic scenes showing the pleasures and pastimes of the men overseas.—Montreal Correspondent Canadian Press.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

Unemployment Measures**Relief Figures For Five Cities Tabled In House**

A total of \$2,986,140 was disbursed to the cities of Vancouver, Calgary, Regina, Toronto and Quebec from last March to date under the government's unemployment and farm relief plan, according to a return tabled in the House of Commons. This sum was distributed in part in direct relief and in public works.

The totals for the various cities follow:

Vancouver	\$772,484.13
Calgary	630,600.84
Regina	334,044.78
Toronto	1,006,713.44
Quebec	252,297.35

Must Study Japanese

The study of the Japanese language is made compulsory under new regulations announced for all primary schools in Fengtien province, of which Mukden is the capital. Similar regulations are being enforced throughout Manchukuo.

Cambridge, England, is to have a new \$2,500,000 library building.

Nothing lowers and depresses you more than the poisons of unsuspected constipation. Take Eno every morning.

TAKE ENO'S FRUIT SALT

Discovery Will Aid**Radium Production****Formula For Treatment Of Ore Developed At Ottawa**

It is anticipated that as a result of the development of a formula for the treatment of Canadian pitchblende ores, production of radium in its commercial form can be carried out on a larger scale in Canada, with simpler processes and lower costs than anywhere else in the world.

Referring to the possibilities of the formula which was developed in the mines branch, Hon. W. A. Gordon, Minister of Mines, said:

"Fortunately for the new field, and fortunately for humanity, the Canadian process will permit as great, if not greater, percentage of recovery, involving a shorter time and less complicated operations than any of the known methods. I have every confidence that Canada not only will be able to supply our own needs for therapeutic, scientific and commercial purposes, but we will be able to enter the world markets in competition with any existing monopoly."

Valveless Motor Device For Boats**Vast Alterations In Engine Production Seen By Inventor**

Invention of a valveless four-cylinder motor for boats is claimed at Indianapolis, by John Irvine, who says he worked eight years on the project. Irvine believes the invention may result in vast alterations in engine production.

Valveless motors of two cylinders are in use, according to Irvine, but four-cylinder engines failed because of sticking of cylinders. Irvine said he had overcome this difficulty and found his invention to be a success in several tests.

The motor is water-cooled and is capable of driving a small craft 40 miles an hour, according to its inventor.

Irvine said he believed that with a few additional improvements his motor could be adapted to aeroplanes and automobiles.

Smith—It must be nice to own a Miller—I know it should be, but I've never enjoyed it. Either the car is being repaired, or else I am.

Three presidents of the United States—Martin Van Buren, Millard Fillmore and Theodore Roosevelt—were born in New York state.

EVEREADY

LAYERBILT

EVEREADY Layerbilt

"LOWER PRICES LONGER LIFE!"

Good news for owners of battery-powered sets! Eveready Layerbilt "B" batteries are now selling for 25 to 30% less than last year's prices.

Put pep into your radio. There's nothing like Eveready Layerbilt's ginger up reception—there's no other battery packed so full of active, current making material.

Every inch of space produces power. There's no waste space. It's all battery—all value. Look for the name Eveready.

MAKE CHANGES IN OPERATION OF RAILWAYS

Ottawa, Ont.—The "Canadian National-Canadian Pacific Act of 1932," containing legislation designed to bring about far-reaching changes in the operation and conduct of the Dominion's transportation systems, was introduced in the senate recently by Rt. Hon. Arthur Meighen, government leader.

Following the recommendations contained in the report of the royal commission on railways and transportation, of which Mr. Justice Lyman P. Duff, of the Supreme Court of Canada, was chairman, the act is divided into three parts.

Part one deals with reorganization of the Canadian National system. It provides for replacement of the board of directors by three trustees, one of which, the chairman, will devote his full time to the work, and whose tenure of office will be seven years. The salaries are not fixed in the act.

The trustees will have full power to control the Canadian National without consultation with the shareholders or with the government, and will appoint managing officers, including a president, who will be responsible only to the trustees.

Part two deals with cooperation between the Canadian National and Canadian Pacific and orders that the two systems take whatever steps desirable to eliminate, consistently with the proper handling of traffic, unnecessary, wasteful or uneconomical services, and to make joint use of facilities wherever advisable. No authority for any amalgamation of companies is given.

Part three sets up a tribunal to deal with the disagreements between the two systems. This body will be composed of the chief commissioner of the board of railway commissioners for Canada, who will be presiding officer, and one representative each from the Canadian National and Canadian Pacific.

In disputes of major importance either company may ask the president of the Exchequer Court of Canada to appoint two additional members to the tribunal. In the event of any conflict between an order of the board of railway commissioners and the tribunal, the order or decision of the tribunal shall prevail. Appeal from its judgment will be to the Supreme Court of Canada.

Earl Of Bessborough Celebrates Birthday

Canada's Governor-General Passes Fifty-Second Milestone

Ottawa, Ont.—Born on October 27, 1880, the Earl of Bessborough, Governor-General of Canada, has celebrated his 52nd birthday. Birthday festivities were extended by his excellency from all parts of the Dominion, and from many distant lands in which he is widely known.

The Earl of Bessborough is the ninth holder of a title which dates back almost 200 years to 1739, when the first Earl of Bessborough was created. He succeeded to the title on the death of his father in 1920.

Montreal Bandits Make Haul

Montreal, Que.—A swiftly executed hold-up secured for three unmarked men the sum of \$12,000 in cash, and bonds valued at \$1,500, when they swooped down on a branch of La Banque Canadienne Nationale, on Cherrier Street, lamed the manager and five employees in the vault, scooped up the money and escaped.

Says Capitalist System Fails

Toronto, Ont.—The capitalist system has fallen and changes must be made to meet conditions—but the changes must be made in an orderly fashion, without violence or haste. This is the conclusion of Sir Norman Angell, M.P., famous student of international politics and former journalist.

No Offer Made

Ottawa, Ont.—The area known as "Garibaldi Park" in British Columbia, has not been offered to the Canadian Government on any terms, the House of Commons was advised in reply to a question asked by A. B. Gunn, (Cons., Vancouver North). The question was answered by Sir George Perley, Minister without portfolio.

Air services between Haiti and Kingston, Jamaica, have just been inaugurated.

W. N. U. 1936

Canada Assured Of Large Lumber Market

But Full Advantage Cannot Be Taken For Some Time

Ottawa, Ont.—Assured of a large potential market for lumber in the United Kingdom under the new trade treaty with that country, Canada will not be able to take full advantage of it for from three to five years.

This statement was given the House of Commons by one of the leading operators of northern Ontario and the chairman of the committee which represented the Canadian lumber industry at the imperial economic conference, George B. Nicholson (Cons., Algoma East).

It was one of two conflicting views on the effect of the treaty on the lumber industry given the House in the course of the debate on ratification of the treaty.

A. W. Nell, (Ind., Comox-Alberni), said the lumber preference would be of no value to Canada because Scandinavian countries, operating on depreciated currencies, could still undersell Canada.

Mr. Nicholson said the potential market for Canadian lumber obtained would amount to more than 1,000,000,000 board feet. The British market at the moment, was saturated with lumber from Russia and central Europe and Canadian lumber had not sufficient stock on hand to satisfy British market.

Oil Company Withdraws

Montreal Firm Decides To Drop Russian Barter Scheme

Montreal, Que.—One party to the three-cornered aluminum products deal has decided to withdraw from the transaction. Joseph Elle, a director of Lesatle Petroleum Refining Company, has announced his company will not further shipments of oil.

"There seems to have been some dissatisfaction about the whole deal," Elle said. He did not, he said, wish to "be bothered" with any more of the business.

Ottawa, Ont.—Complaints in connection with the quality of the Soviet oil imported recently into Canada are being investigated, the Prime Minister told Hon. Ian Mackenzie (Lib., Vancouver Centre), in the House of Commons.

Lose Trade Advantage

Irish Free State Will Not Receive Benefit Of Preference After November 15

London, England.—The Irish Free State will lose the advantage of imperial tariff preferences in the United Kingdom on November 15, J. H. Thomas, Dominions Secretary, told House of Commons.

On that date, he explained, preferences granted goods from the Dominions under last year's tariff act will expire, and as the Free State failed to conclude any trade agreement with the United Kingdom at the Ottawa economic conference its exports to Great Britain will be accorded tariff treatment similar to that affecting goods from foreign countries.

Indian Terrorists

Disease-Infected Needles Said To Be Used On Europeans

London, England.—The Exchange Telegraph Agency's Calcutta correspondent reported that political terrorists in India are using disease-infected needles in attacking European and Anglo-Indian office girls en route between their offices and homes.

Thirteen cases of such attacks already have been reported, the correspondent said.

To Discuss Tariffs

Ottawa, Ont.—Liberal members and senators met in caucus to set up committees to study individual tariff schedules affected by the Canada-United Kingdom Trade Treaty. The tariff schedules will be reviewed individually by the House of Commons after the treaty as a whole has been ratified.

Thought It Was a Gas Station

Galt, Ont.—A joke is a joke, but when motorists add injury—that's different. William Mulhail, Detroit, for instance, sped through the Village of Birt at 95 miles per hour. When he appeared in court he declared he thought the village was a gas station. He was fined \$5 and costs.

Depression Hits Shippers

London, England.—The annual report of Lloyds register on shipping revealed that the economic depression has laid up 15,000,000 tons or the equivalent of 20 per cent. of the world's total shipping.

Russian Plan Is Ahead Of Last Year

But Increase Planned For 1932 Not Half Reached

Moscow, Russia.—With the end of the first five-year plan only a little more than two months off, official figures published showed that Russia's industry as a whole accomplished less than half the increase planned for 1932, but still is running considerably ahead of last year.

The country's entire industrial production for the first eight months of this year, including heavy and light industries, lumber and food industries, reached a combined average of 14.9 per cent. above the same period of 1931, as compared with a scheduled increase of 36 per cent. for the whole year of 1932.

Preparatory Conference

Conference To Negotiate Russo-Jap Treaty Is Called

Tokyo, Japan.—A preparatory conference to negotiate a non-aggression treaty between the Soviet Russian and Japanese Governments will be held here, the News Service Nippon Dempo said.

Count Yasuo Uchida, Japanese foreign minister, conferred with Premier Makoto Saito and Sadao Araki, war minister, regarding the treaty. After hearing Ambassador Koki Hirota's report on the Russian attitude, Uchida ordered his office to start preparations for the treaty.

WORK TO BE PROVIDED FOR THE UNEMPLOYED

Ottawa, Ont.—Public undertakings such as sewers and waterworks, to an amount running between \$11,000,000 and \$12,000,000 will be completed in various municipalities throughout Canada up to the end of December, as a measure of unemployment relief.

Road construction will be carried out in Nova Scotia, Ontario, Manitoba and Alberta. Relief camps will be operated in the prairie provinces. Additional families will be placed on farms in eight of the nine provinces.

In the west the plan of boarding men on farms, with the farmer receiving \$5 per month and the boarder a similar sum, of which the Dominion Government will pay 50 per cent, will be continued. Work will be undertaken in the national parks and by the department of national defence in the establishing of emergency landing fields.

The amount of money granted by order-in-council to the Minister of the Interior for the work which is to be carried out this winter in the national parks of Canada is \$200,000, according to the terms of the order-in-council tabled in the House of Commons. The money takes care of homeless single men.

"If an confident no one in this country need worry about being provided with food, clothing and shelter this winter," Hon. W. A. Gordon, Minister of Labor, informed Hon. Ian Mackenzie (Lib. Vancouver Centre), in the House of Commons.

ARCHBISHOP WORRELL

In order that the work of the Anglican Church in the Prince Rupert Ecclesiastical Province may survive the calamity brought about by misappropriation of funds by ex-Chancellor Machray, Archbishop Worrell, Primate of the Church, has intimated the opening of a fund to which the general body of bishops and clergy and members of the Missionary Society will be asked to contribute.

Noted Economist Resigns

Sir Walter Layton Leaves Committee Of World Conference

London, England.—Sir Walter Layton, noted economist, announced his resignation from the preparatory committee of the world economic conference because of a "serious difference of opinion" between himself and the British Government.

He said he had differed with Neville Chamberlain, Chancellor of the Exchequer, on "what further action is required in order to restore reasonable freedom to the movement of international trade."

Sir Walter does not think the government view that the desired result can be obtained through individual negotiations with foreign countries within limits set by the Ottawa agreements and subject to strict insistence on most favored nation rights will be successful.

Scottish Parliament

No Benefit To Be Gained By Asking For Home Rule

London, England.—Scottish Conservative members of the House of Commons decided not to support any move for home rule in the northern part of the United Kingdom.

At a meeting held under the chairmanship of Sir Robert Horne, a former Chancellor of the Exchequer, they reached the conclusion no benefit could be obtained by setting up a Scottish parliament.

Tea Consumption In Canada

Montreal, Que.—Canadians drink four pounds of tea per capita annually, two-fifths as much as Englishmen and half as much as Australians and New Zealanders and about five times as much as people in the United States, according to T. Reid, of the Ceylon Association, who is returning to England after making a survey of the Canadian market for tea.

BRITISH JOBLESS CONVERGE ON LONDON

It is understood from the British Home Office that communistic organizations are responsible for the attempt of an army of unemployed men to disrupt the Parliamentary session which is at present in progress. Above is a good photo of the Mother Parliament, while inset is Premier MacDonald, who is endeavouring to overcome what might be a serious disturbance.

Short Rail Haul

H.R. Route Offers Decided Advantages For Shipping Cattle To Britain

Saskatoon, Sask.—The short rail haul from the prairies to Churchill make the Hudson Bay route most advantageous for the shipping of cattle to the British market, was the opinion expressed by Professor A. M. Shaw, dean of agriculture, at the quarterly meeting of the Saskatchewan Board of Trade. "The navigation season opens too late to permit of large movement of grain fed cattle," he said, "but affords ready and profitable outlet for grass fed prairie beef."

Dean Shaw was of the opinion that cross-bred cattle, developed through experiments carried out by the University of Saskatchewan, made it possible for Canadian packers to compete with Argentine in the chilled meat market in Great Britain.

Federal Aid Requested

Regina Thinks Government Should Share Expenses For Airport

Regina, Sask.—Dominion assistance in bearing part of the carrying charges on the Regina municipal airport will be sought by City Commissioner R. J. Westgate, who has gone east. Mr. Westgate will be absent from the city for about 10 days. During that time he will attend a meeting of the Anglican Church in Toronto and will visit Ottawa on civic business.

It has been the claim of the city that the airport was developed to its present state because of the air mail service. Since this service has been discontinued, the port is no longer revenue producing and the contention is that of the fixed charges the Dominion Government should assume part.

Provinces Will Be Aided

Federal Government Promises Help If Needed For Relief

Ottawa, Ont.—The government is not in a position to make any exact pronouncement or policy respecting unemployment relief, but if any responsible provincial government officials report their inability to care for the needy within their jurisdiction the government will take "adequate action," Hon. W. A. Gordon, Minister of Labor, told the House of Commons.

FAIRNESS TO ALL IN PENITENTIARY INVESTIGATION

Ottawa, Ont.—Local radicals planned a demonstration on parliament hill in connection with the visit of 15 relatives and friends of the Communists confined in Portsmouth penitentiary, according to notices posted here.

A sweeping investigation was under way at Portsmouth penitentiary with fairness being meted out to all, and so far there had been no development indicating the necessity of a public inquiry, Hon. Hugh Guthrie, Minister of Justice, said to 15 members of the Canadian Defence League who waited upon him. The party was refused admission.

"If a situation develops," the Minister told the delegation, "that calls for a general or open inquiry, I will be prepared to consider it. At the present time I see no reason for such an inquiry."

With a suggestion of Edward Smith, Toronto, that the riots at the institution "were strikes, the same as the strikes of any industrial workers," the Minister of Justice disagreed, holding them more in the light of revolts.

The eight incarcerated Toronto Communists were styled "political prisoners" by the delegation, who were entitled to special treatment. "We have no political prisoners in Canada," the Minister of Justice declared. "Anyone can hold any political ideas he may like so long as he stays within the law. We have no political prisoners."

No discrimination whatever would take place at the institution in regard to the eight Communists, Mr. Guthrie stated. "No favors or no discriminations will be shown to any prisoner during the inquiry."

"These statements are being taken down by a competent stenographer, and will be forwarded to me from day to day," the Minister declared. No copies had reached him yet. When conditions became normal, the Minister said he personally would see that the visits of relatives to the prisoners would be resumed.

MANY INJURED IN BOISTEROUS RIOTS IN LONDON

London, England.—Two thousand hunger marchers, converging on London from all parts of the island, reached their goal in Hyde Park, traditional home of free speech, and precipitated the most boisterous riot London has seen in years. A score were hurt, nine requiring hospital treatment.

Singing revolutionary songs, the jobless demonstrators swung through London traffic behind the banner of the Communist hammer and sickle. Up to the Marble Arch which leads into the park from Great Cumberland Place they marched through lanes of mounted police.

A squadron of police moved their horses to press back the crowd. Somebody threw a brick through a post office window. It was the signal for battle. Men and women in the mob screamed defiance at the police. The mounted men charged and the mob fell back, only to form again. Bricks and stones whizzed past the policemen's heads. Dozens of windows were broken. The rioters pulled branches from the trees in the park and tore up the park railings as weapons.

When the shouting and the tumult of the riot was at its height, mobs formed inside the park and threatened the police from the rear. For a time it looked as though things might get out of hand. The police, however, had made elaborate preparations for just such an event and they were ready. But it took an hour to subdue the rioters.

At the beginning of the trouble the crowd inside the park, around 50,000, had been entirely peaceable. Two dozen or more soap boxes had been set up and from these the orators ranted against the conditions of the jobless. Most of their condemnation was directed against the "means tests."

The demonstration was the climax of a nation-wide gathering of unemployed and the goal was the famous park in the city's heart where the 2,000 marchers, augmented by many thousands of London's unemployed, planned to protest the "means test."

Approximately 5,000 police mounted and afoot, were assigned to special duty for the occasion, demonstrating the fact that never before had Scotland Yard taken such elaborate precautions to deal with a demonstration by the workless.

Police van motors, wireless equipped, and motorcycle squads kept headquarters in touch with the dozen or more contingents of marchers, as if the whole business were a battle maneuver.

A drizzle and chill wind, to which the marchers have long since become accustomed, failed to dampen the ardor of the various columns as they moved in from the rim of London with red flags flying.

British Preference

Ruling Made Regarding Canadian Shipments To Britain Via U.S.

Ottawa, Ont.—Canadian goods being shipped to the United Kingdom will receive the British preference if consigned directly from Canada to Great Britain, whether they pass through the United States or not.

Canadian goods consigned to the United States and then reconsign to the United Kingdom will not receive the preference. Premier R. B. Bennett made this explanation of the British tariff regulations in the House of Commons.

British custom commissioners have to have proof that the transit has been uninterrupted before the preference is granted.

Lindbergh's Son Named

New York.—The World-Telegram says that the second son of Col. and Mrs. Charles A. Lindbergh has been named Jon Morrow Lindbergh. The son was chosen for a Scandinavian forebear of Col. Lindbergh's, Morrow is Mrs. Lindbergh's maiden name.

Cyclone Hits New Zealand

Auckland, N.Z.—A cyclone left a trail of destruction many miles long and about 300 miles wide in the Warkworth district. Buildings were razed, roofs torn off, trees uprooted and general havoc wrought. There were no deaths or serious injuries.

Big Terminal Elevator

Victoria, B.C.—At the rate grain is pouring into the Ogden Point elevator of the Alberta Wheat Pool, the 1,000,000-bushel capacity will soon be filled. There is a total of approximately 250,000 bushels of grain in the elevator at the present time.

Vancouver Grain Shipments

Bringing Back Commerce That Has Been Going To U.S.

Vancouver is winning her grain triumphs, not at the expense of other Canadian ports but in bringing back to "all-red" channels commerce that had been allowed to go to the United States.

As much as 67 per cent. of the Canadian wheat crop was once handled by United States, it is pointed out by Robert McKee, president of the Vancouver Merchants exchange, in his presidential survey of foreign trade distributed to members.

But last year only 19 per cent. of Canada's wheat harvest, "as Vancouver's exports increased," went through the United States.

"The growth of the western route has not been at the expense of eastern Canada ports, their percentage of the wheat movement having remained fairly constant during the past ten years at about 33 per cent. and during the crop year just closed they handled an even higher percentage, 37 per cent.," said Mr. McKee.

"The grain being shipped through Vancouver has been diverted from United States Atlantic coast ports."

Of wheat alone in the crop year ended July 31, 1932, Vancouver handled 44 per cent. or 700,000,000 bushels of Canada's exports. Eastern Canada ports handled 37 per cent. or 64,000,000, and the United States 33,000,000 or 19 per cent., compared with 67 per cent. in 1921.

The outlook for the present year Mr. McKee considers very favorable, with a good possibility of increased volume of shipments owing to the big crop in Alberta, whence comes most of the flow to the Pacific coast.

The prospects of continued improvement in the flour trade with China, where Canada has built a large business in the past ten years, are not so satisfactory in Mr. McKee's view. He points to these three main adverse factors:

(1) Severe competition by Australia, whose exchange position is more favorable.

(2) Large quantities of flour sold to China by the United States farm board on credit for food relief purposes, but which have largely gone on the open market.

(3) The small percentage of low-grade wheat in the Canadian crop in the past two years. (China hitherto has purchased only a low-grade of flour).

However, says Mr. McKee, Canadian wheat is today cheaper in terms of silver than it was last season.

In the first six months of 1932 flour exports to China have amounted to 521,241 barrels. In the whole of 1931 they were 1,058,325, compared with the record year of 1929, when they were 2,809,494.

On the Shores Of Galilee

Historic Stone On Which Christ Stood Believed To Have Been Uncurbed

The boulder upon which Christ stood on the shores of the Sea of Galilee to perform the miracle of the loaves and fishes is believed to have been discovered at Tabgha, near Tiberias, Palestine. The stone was found in the centre of a fourth-century church recently uncovered, and is presumed to have been beneath the altar. The church was one of the many built during the reign of Constantine the Great. Behind the stone was found a mosaic panel, depicting in vivid black, red and yellow, a basket, several loaves and two fishes.

In the western half of the church a mosaic floor was uncovered, and is about 15 feet long and 21 feet across. It contains a design of storks and other birds, and is said to be the best-preserved mosaic floor ever found in the Holy Land. Although buried beneath dust and rubble for about 1,600 years, the mosaic shows no signs of erosion.

Man With Two Hearts

Edward Reynolds, 32, of Pittsburgh, possesses two hearts. The discovery came through a swimming accident when Reynolds was 20 years old. A doctor, setting a broken arm, was surprised to find his heart on the right side. Later an X-ray showed he had another heart, although much smaller, on the left side.

A dentist advises that he will accept his pay in chickens. This is called reciprocity; you fill my cavity and I'll fill yours.

The coldest town on the British Isles is Braemar, which has an average yearly temperature of 11.3 degrees above zero.

W. N. U. 193A

Planning Further Use For London Mansion

St. Dunstan's May Become International Hostel For Children

St. Dunstan's, the famous London mansion which has been empty for four years since it ceased to be the headquarters of the movement for training war-blinded soldiers, may be converted into an international hostel for children. If the scheme matures children from all over the United Kingdom, the empire and Europe will gather at the mansion for a stay of a week or two to study and visit places and things of interest in London, and Regent's Park may become the greatest "children's park" in Europe.

The School Journey Association, a voluntary body of 4,000 teachers, whose vice-president is Lord Burnham, and who arrange in their spare time educational holidays for more than 50,000 school children a year, is sponsoring the equipment of the mansion. A third of the sum required to convert the building into a hostel has already been subscribed, mostly by the teachers of the United Kingdom themselves, and as soon as the necessary fund can be completed the work will be begun.

An official says it is intended to accommodate 120 children a night, and to have as a feature a good travel library of guide books, maps and charts. The office of works is doing its best to forward the scheme and the treasury has fixed a purely nominal net of \$300 for the mansion.

St. Dunstan's was built by permission of Queen Victoria on crown property in Regent's Park. It was at first known as St. John's Lodge, and was a home of Lord Bute. It was converted into a military hospital in 1914, and at the close of the war became the headquarters of Arthur Pearson's organization for training blinded soldiers.

Marler Says Canada Experienced Nation

Youth Over-Emphasized Declares Canadian Minister To Japan

"Canada is often spoken of as a young country; in my opinion our youth is over-emphasized," Hon. H. M. Marler, Canadian Minister to Japan, said at Vancouver in an address at the University of British Columbia, where the honorary degree of LL.D. was conferred on him.

"We are not really a young country, nor are we wanting in experience," he said. "Have we not out of our diverse elements solved the problem of self-government? Have we not welded together an Empire stretching from Atlantic to Pacific? Have we not achieved fifth place among the trading nations of the world?"

"Few nations that are called 'old' are able to say as much. If we ponder over this we should realize we are not young, but an experienced nation, quite capable of conducting our own affairs in foreign lands."

A Good Bird Story

Large Flock Caught In Tar Spread On Roadway

One day last summer, while a gang of workmen were laying a pavement near Tiffin, Ohio, they spread a section of the road with liberal quantities of tar as an adhesive.

While the crew was working at another point, a large flock of migrating birds swooped down, settled on the fresh roadway and got stuck in the tar, making the road look like a gigantic strip of flypaper. The local State game warden was called, and an appeal to Canadians to be aware of the road with liberal quantities of tar as an adhesive.

One Peculiarity

History was the subject of the morning lesson in the boys' school.

"Tommy White," said teacher, "tell the class what you know of the peculiarities of the Quakers."

The boy got fidgeting to his feet, but not a word came from his lips. "How does their way of speaking differ from yours and mine?" the teacher put in coaxingly.

"Well, sir," said Tommy, "they don't swear."

The world's population in 1927 was estimated at 1,960,000,000 by the League of Nations.

War gas marks are being sold in Koenigsberg, Germany, at 25 cents each.

GREETING A "FORGOTTEN MAN"

Governor Franklin D. Roosevelt is shown as he talked with a mine worker as he passed through West Virginia coal district en route to Wheeling, where he delivered a campaign speech. The Democratic candidate discussed the labor situation with the miner, who answered in broken English that he worked six days for six dollars.

Punishment Was Just

Woman Fined For Mailing Letter Bearing Previously Used Stamp

That ironic form of punishment known as poetic justice was so completely visited upon a British woman of late that all the world should hear about it. The woman, described by the London Morning Post as well-to-do, handed into a post office a letter bearing a three-halfpenny stamp which had been previously used. For doing this she was brought before the magistrates fined £25 and ordered to pay costs to the amount of £7. 7s.

Evidence produced before the magistrate was that the letter was to a betting commissioner, placing bets on horses which won and which would have yielded a profit of more than £22. The letter was not delivered; the bets were not placed; the profit was not made. All for lack of a three-halfpenny stamp.

Farming Is a Business

And Should Be Organized On a Business Basis

Here is what Dr. J. C. C. Oke, Assistant Director of Agricultural Economics, Ottawa, has to say about the farmer in national economy writing in the current issue of the Economic Analyst:

"The modern farmer is an entrepreneur—an owner and organizer of a business in which he and members of his family perform a good deal of the manual work connected with the enterprise. He buys and sells commodities. He employs labour and directs it. He seeks an income which will enable a satisfactory standard of living. It may be well, therefore, for all those interested in agriculture, to bear in mind that farming will be a better way of getting a living when it is organized on a business basis."

Polite Irony

It was a long play, and was being shown at the village hall. The curtain was rung up on the fourth act, disclosing an actor sitting wearily at a table. All was stillness; he had not spoken. At last a member of the audience ventured to express the sentiments of the house.

"I hope we are not keeping you up, sir," he suggested kindly.

Landlady: "So Mr. Newboard has found something fresh to complain about this morning."

Maid: "No, mum, it's the eggs."

Apple Belt Moves North

Standard Apples Grown Successfully At Beaver Lodge, Alberta

That Canada's apple-growing belt is moving northward is shown by the fact that standard apples have been grown this year at the Dominion Experimental Farm at Beaver Lodge, Alberta, which is 425 miles north of the international boundary between Canada and the United States. Crab apples and small seedlings have been known to ripen further north but not standard apples. A new market for Canadian apples has started this year with the first shipment of more than 750 boxes from British Columbia to South Africa. The fruit left the Western province in a refrigerator car travelling by way of Montreal to Cape Town.—Department of Agriculture, Ottawa.

Bacon Hogs

Possibilities Of Swine Production In Canada Not Fully Explored

Some interesting facts about the production of bacon hogs in Canada are outlined by G. B. Rothwell, Dominion Live Stock Commissioner, on a recent occasion when he asserted that the possibilities of pig production in Canada have never been fully explored. In developing the export market the building up of a consistent volume is equally important with maintaining the right quality. While there are certain climatic limitations to bacon production in Canada, these are more than offset by the range in quality of feeds available.

Where Dobble Scores

In meek content he stands Beside the pasture bars. Or grazes on the grass: And now and then he lifts his head, As if in speculation, And gazes on the speeding cars that pass: Then in a sudden burst of wild elation, He makes a leap, and starts To run in childish glee, Kicking his heels: For doesn't he, though old, Still carry all his bones in natural relation!

While over on the old scrap heap All unsummed lie, in ignominious parts And deep humiliation, Automobiles.

—Magdalene G. Clark.

Gave Him No Thrill

Aviator Describes Attack On World's Altitude Record As Boring

Men who accomplish great things generally belittle their achievements, or at least refrain from showing any of the excitement that mere bystanders show. Captain Cyril Uwins, is no exception to the rule. The Captain was asked to describe his sensation while flying in the stratosphere more than eight and half miles above the earth at Bristol, England, recently and replied with two words, "unusually boring." Captain Uwins' feat was his attack on the world's altitude record in a Vickers "Vespa" airplane fitted with a Bristol "Pegasus" engine and, despite the coolness with which Captain Uwins regarded the entire proceeding, the flight was one of the greatest in aeronautical history. It was the more dramatic because the elaborate preparations, occupying many months, had been kept a closely guarded secret. It was only when the officials of the Royal Aero Club were hastily summoned from London to Bristol to observe the flight that the facts became generally known.

Captain Uwins climbed for about two hours in the "Vespa." The whole time he was fed with oxygen and his clothes and even his goggles were electrically heated. At 45,000 feet, the height recorded by the instruments, no man could have lived for a moment without these appliances for the thermometer registered more than 100 degrees of frost and the air was so thin that death from oxygen want would have followed if the artificial supply had failed. Captain Uwins, who was less excited about his achievement than anyone else, stated after he had descended that he would have gone on climbing and believed that the airplane could have gone higher except that the petrol supply was coming to an end. Before this flight, on two or three occasions he had flown at more than 40,000 feet to test the machine and engine.

According to his instruments Captain Uwins exceeded by an adequate margin the world's altitude record; but before official confirmation of a new record is possible the sealed barographs carried on the flight have to be inspected and tested by the National Physical Laboratory and their readings have then to be corrected for atmospheric pressure and density. —St. Thomas Times-Journal.

"Hope Springs Eternal"

Indispensable To Humanity, But Often It Is The Author Of Tragedy

One of the strangest quirks of human nature is the hope which "springs eternal in the human breast." It is the mysterious little thing which sends the soldier into the thick of the fray, confident that he will come out alive and unscathed. It is the ineffable something which permits man to live happily unmindful of inevitable death. It is the optimistic, omnipresent companion of man through the vicissitudes of life. Without it life would be unbearable to the multitudes.

But while hope is indispensable to humanity it is not infrequently becomes the author of tragedies. After sowing a full field of happiness hope sometimes harvests a bumper crop of sorrow and misfortune. There is an adage that "man cannot live on hope alone." Those who try it usually suffer only disillusionment or starvation. Hope is responsible for a great deal of human misfortune.

Some of those who overwork hope are the workmen who, hopeful of continuous employment and high wages, preserves none of his earnings; the husband and father who, hopeful of dying at an independent old age, fails to give his family and himself the protection of life insurance; the property owner who hopeful of never having a fire, places no fire insurance on his property; and the man who, hopeful of permanent good health, neglects to preserve his health. —St. Catharines Standard.

Candidate—I suppose in this campaign the proper thing for me to do is to stand on my record.

Political Boss—No; to jump on the other fellow's.

Political Speaker—I am exceedingly pleased to see such a dense crowd gathered here tonight.

Voice—Don't be too pleased. We ain't all dense.

"Let me see," said the smart girl, "was it you or your brother who used to be one of my admirers?"

"Probably my father," replied the once-rejected suitor.

Boy: "I want some rope like this." Shopkeeper—"How much?" "Why, enough to reach from the goat to the fence."

Machine Not Infallible

Inventor Of "Lie Detector" Admits It Sometimes Errs

Dr. John A. Larson, the "only Ph. D. cop in the world," has written a book in which he admits that the lie detector of his invention is fallible. No man should be sent to jail or should any suspect be released from custody, solely on the evidence of the lie detector, according to Dr. Larson, who is an assistant state criminologist.

"The machine, he wrote, is inaccurate in so far as the human interpretations of its records may be faulty. The percentage of error is from 5 to 25 per cent."

Dr. Larson invented the lie detector while serving as a policeman under Chief August Volmer in Berkeley, California, in 1921. It consists of a cut which is placed about the upper arm to register blood pressure, and of a tube about the chest to measure respiration.

The blood pressure and respiration of the suspect under questioning are recorded on a cylinder of paper driven by a synchronized motor. The variances at the time the subject answers key questions determine whether he is telling the truth.

Dr. Larson, who has used his device continuously for eleven years in criminal cases, said its greatest value lies in protection of the innocent. The real merit of the machine, in his opinion, is that it "gets at the truth" without "third degree" methods.

In eleven years the criminologist reported finding only seven persons who lied without being detected. These cases were of mental defectives, psychopaths, and drug addicts. Of hundreds of suspects, seven refused to take the test on advice of counsel and later were found guilty.

Dr. Larson wrote:

"The lie detector does not get false confessions because there is no pain and nothing to inspire fear but a guilty conscience. Put a rat in a cell of a nervous woman and she will confess to anything. Hit a weakling in the stomach with a Billy after every question, and the same result will be gained."

Dr. Larson's book, just released by the University of Chicago Press, is entitled: "Lying and Its Detection."

Centre Of Lloyd's Business

Whole Fabric Of Firm Revolves Around The Room

Phillip Jordan writing in the Fortnightly Review, says:

"The main business of Lloyd's—which is underwriting insurance risks—is carried on in a room. Around the room is a constructed and revolves the whole fabric of Lloyd's. In practice, as in spirit, the room is the centre of the building."

Admission to the Room is granted only to those who, in one way or another, subscribe to Lloyd's. No stranger may enter the bronze gates that bar it from the world outside, unless accompanied by one who has the entree. In this respect Lloyd's differs from the London Stock Exchange, into which no stranger may ever penetrate.

Over all the Room hangs the famous Lutine bell, itself an institution that is as well known as Lloyd's itself. It is rung when there is news of importance to be communicated to the underwriters who work beneath it, as it hangs on the Rostrum, above the caller's head. It is rung when royalty or other distinguished visitors appear in Lloyd's. When a ship is lost, the bell is tolled."

Chickens Travel By Plane

Seventy Hens Taken By Aeroplane To The Far North

Hens are poor air travellers, W. A. Spencer, aviator from the Great Bear Lake district, stated on arriving in Winnipeg by aeroplane from the north. He carried 70 hens to the Island Lake Catholic Mission some time ago, giving children of that locality their first view of tame chickens. The fowls recovered from severe cases of air sickness, and their eggs are selling for a dollar a dozen.

An early winter was predicted by Mr. Spencer, because cold weather set in two weeks earlier than usual in the north.

"Does the foreman know the trench has fallen in?" asked the master of works.

"Well, sir," replied the navy, "we be digging him out to tell him."

Arab laborers under the supervision of British constables recently moved \$4,500,000 from the Palestine treasury to Barclay's Bank, Jerusalem.

British Museum Has Most Amazing Collection Of Old Newspapers Ever Assembled

Can you imagine coming downstairs one morning, getting your newspaper from the verandah and over your grape fruit reading as current news that for the first time in history a locomotive had run on rails drawing 38 coaches at the staggering speed of 12 miles per hour?

The British Museum has just opened a new branch for the storing of its collection of newspapers, the most amazing collection in the world. In this new building is housed a copy of every newspaper—British, Dominion and foreign—published since the year 1800.

The enormous output of literature of every kind has made this new building a necessity. The British Museum endeavours to obtain a copy of every book, printed, from multiplication tables and bed-time stories to the he-man Epics of Ethel M. Dell and the novels of Elinor Glyn. There was no room for both books and newspapers so the latter have been given a new home.

The new building is located at Colindale, near Hendon, some 10 or 12 miles from the Museum itself. It is of concrete and steel with brick veneer and cost over £300,000. It already contains 275,000 bound volumes of newspapers weighing 20,000 tons. They occupy 14 miles of shelves. There is still room to absorb the world's output of newspapers for the next 50 years.

The reading room is 87 by 30 feet with sitting room and ample desk accommodation for 56 readers. The work of binding is done on the premises by the museum staff.

The building is open to the public. Application has first to be made and a ticket of admission obtained. Armed with this, anyone can walk in, fill up a form and in a remarkably short space of time any newspaper required is laid before him.

It is an indescribable experience to read as red-hot news what we all once had to learn laboriously as history. These papers go back to the Battle of Trafalgar and beyond; the escape of Napoleon from Elbe, his defeat at Waterloo, the abolition of slavery throughout British and later American possessions; the deaths of George the Fourth, William of the same regal number, Victoria the Good and Edward VII; the crossing of the Atlantic by the first steamer, the inventions of a thousand and one miraculous things which are commonplace today; the institution of penny postage, Franklin's ill-starred expedition to the Arctic, the proclamation of a republic in France, wars by the score.

From a historical viewpoint probably these newspapers have little value, history being a matter of perspective, but at least they do portray current thought at the time events which have since become history were actually taking place. What a tragedy they do not go back further still. Think of the thrill of reading, say, the news of the death of Cleopatra—"Queen of Egypt succumbs. Famous beauty succumbs to asp bite"—would make telling headlines.

Then the lead. Inconceivable in her grief at the death of Anthony, Cleopatra decided to end her life. Dismissing her servants and accompanied only by her favorite asp she retired to her couch. She was found later by a servant who gave the alarm. The court physician diagnosed the case of death as snake-bite.

The paper's medical correspondent would then describe for the benefit of the uninformed, the precise effect of a bite in the bosom. Alas there is no such newspaper in existence.

But the collection of newspapers which is gathered here must cause politicians a lot of uneasiness. They can always be confronted with what they said in a moment of exasperation or in the days before they turned their political coats inside-out.

There is no point in the question as to what Gladstone said in '84. The answer is on file. Gladstone, being dead, can never claim to have been mis-reported.

Record Sugar Beet Crop

The largest crop on record, the yield of sugar beets grown this year in the province of Alberta, Canada, is estimated at nearly 130,000 tons from which about 36,000 pounds of sugar will be produced with several hundred tons of molasses.

Mountain goats are classed as the rarest and wildest of Rocky Mountain game.

W. N. U. 1908

The Canning Season

Thrifty Housewife Will Store Away Fruits and Vegetables For Winter Use

A timely suggestion comes from the Dominion Fruit Branch at Ottawa in the form of a message which has a real appeal to housewives all over Canada, whether in the farm home or in the city. We all know the difficult straits in which many of our fellow citizens find themselves as a result of conditions entirely beyond their control. With a wealth of fruits and vegetables available at lower prices than for many years, and with other necessary things such as sugar and containers equally available, there should be no need to elaborate about a ready response to the appeal "Just can a little more, if you can, when you can."

Mystery Chest Opened

Left By Bishop Has Mocked Inquisitive For 22 Years

The "mystery chest" left by the famous "heretic" Bishop Coleman with instructions that it should not be inspected until the last member of his family had died, has at last been opened.

For 22 years the chest stood in St. Mary's church at Maristburg, Natal, S.A., mocking the inquisitive.

Government and church officials crowded around when it was opened. Only an ant's nest and a piece of red cloth were found inside.

WHAT NEW YORK IS WEARING (By Helen Williams)

Illustrated Dressmaking Lesson Furnished With Every Pattern

A charming wine-red rough crepe silk with a very graceful bodice arrangement in surplice effect. The sleeves, gathered into deep fitted cuffs, cut in one with the fronts of the waist. The skirt is slightly circular and attached to the waist. It's simplicity itself to make it. Style No. 3174 is designed for sizes 14, 16, 18, 20, 22, 24, 26, 28 and 30 inches bust. Size 16 requires 4 1/2 yards of 39-inch material. It's exceedingly lovely too carried out in black crinkled crepe satin. Price of pattern 20 cents; stamps or coin (coin is preferred). Wrap coin carefully.

PRIEST RUNS A TOTE CLUB

A tote club organized by a Roman Catholic priest, Father Carless, of St. Ann's Church, in the heart of London's dockland, has a membership of 1,200, including 200 women. Father Carless considers betting a legitimate pastime, and as nearly all the members back horses and dogs, he wishes them to get as fair a chance as possible. The profits will be used to pay for the club first and then to improve their social life. Father Carless is shown at the Tote window playing out.

Prairie Wheat Crop

Bank Of Montreal Report Places Yield At 415,000,000 Bushels

Taken as a whole, the principal field crops of Canada have seldom attained such total volume as during the present season or been of a higher quality. Yields were generally satisfactory in each of the provinces despite sectional reverses due to weather conditions or other causes. A preliminary estimate of the Dominion Bureau of Statistics placed the total yield of wheat in the prairie provinces at 446,000,000 bushels but from latest reports a total of around 415,000,000 bushels is now anticipated. Even so, the yield is well in excess of the ten-year average and the largest crop since 1928.

Last year's prairie crop was approximately 300,000,000 bushels. The wheat marketed to date has graded exceptionally high and tests indicate that the high protein content will be maintained. The western oat crop is estimated at 274,000,000 bushels against 187,700,000 bushels last year and the barley crop at 70,000,000 bushels as compared with 50,500,000 bushels.

Severe Test For Firemen

Milan Brigade Called Out To Stop Flood Of Molten Glass

The ingenuity of the Milan Fire Brigade was put to a severe test when firemen were called out to stop a flood of molten glass.

One of the sides of a huge furnace tank in a glass factory suddenly gave way and immediately the whole floor of the factory became flooded with liquid glass.

The workmen all managed to escape, but could not stop the flow from the tank, and the transparent lava spread to the doorway, into the street, and down stairs to the cellars of the factory.

The Fire Brigade sent for large supplies of ice, with which the firemen solidified the creeping margins of the glass. They then turned to the seething bulk itself, hosed it with cold water, and gradually made it all solid. Next day, with the factory very much under glass, the second phase of the work was begun—the liberation with pick and hammer of the densely encased premises.

Workmen's jackets and other personal belongings were visible in the glass as if preserved in ice.

Collectors Seek First Air Mail Envelope

French Group Willing To Pay Million

A first offer of one million francs has been posted by a group of French stamp collectors for the first envelope ever carried by air mail, provided the envelope can be found and its authenticity proved.

The first air mail consisted of a single envelope carried aloft by a Frenchman, Jean-Pierre Blanchard, on Jan. 9, 1793, from a Philadelphia prison court yard to prove the military and commercial possibilities of balloons.

The first letter bore the signature of Washington, addressing good-will to the American citizens. After a flight of 45 minutes, the balloon landed at Woodbury, N.J., and the Washington air-mail letter was delivered to the mayor.

This flight is a matter of historical record. If found the envelope will be officially recognized as being the first air mail letter.

Little Things To Fight

Simple Measures Can Be Taken To Control Internal Parasites In Animals

Dr. Lionel Stevenson, Provincial Zoologist for Ontario, in a recent review of work that done in connection with the control of internal parasites of animals stated that those which give principal cause of concern in the livestock industry are comparatively few. Of these he named six principal internal parasites in sheep, two in swine, two in cattle, three in horses, two in poultry, and five in fur-bearing animals. In the case of most of these parasites it is possible to check their ravages by simple control measures.—Department of Agriculture, Ottawa.

Knew What He Had

He had dined well, but unwisely. At last the time came for him to go home.

In the street he approached a policeman.

"Officer," he said falteringly. "I'm looking for a parking place."

The policeman looked hard at him.

"But you've no car, sir," he said.

"Oh, yes I have!" said the reveler. "It's in the parking-place I'm looking for."

LITTLE JONES (to hobo): "You run a great risk, my man, soliciting alms. How do you know you are not addressing the Chief Constable of the city?"—London Opinion.

Eight Points The Careful Driver Will Observe In Order To Decrease Motor Accidents

Fur Auction

Collection Of Arctic Timber-Wolf Skins Sold In Winnipeg

A collection of 282 arctic timber-wolf skins was sold by auction in Winnipeg recently, the outstanding feature of the Dominion Fur Auction Company's October sale of raw furs. The skins were the property of the Dominion Government and on each one of them a bounty of \$20 had been paid to the trapper regardless of its size or quality. A substantial portion of the pelts had been taken from small pups and the average price realized was consequently lowered considerably.

Prices ranged all the way from 25 cents for small damaged skins up to \$20.50 for large sizes of good quality. The collection averaged \$11.

A collection of late-caught beaver ranged between \$11 and \$17.50 and averaged \$8.55 unchanged to five per cent. higher than the prices realized in August. Cross fox sold unchanged to five per cent. higher, realizing from \$1.80 for badly rubbed skins up to forty dollars for good specimens.

The mink collection was very springy and prices realized were not representative. The range was 25 cents up to \$5.00. Red foxes were in poor demand and mostly bought back. Muskrats were all bought back.

White foxes brought around \$18 for ones and twos with average Mackenzie River and Chesterfield Inlet lots bringing from \$16 to \$16.75, unchanged from the August level.

Marten advanced 10 per cent, ranging up to \$21.50 and averaging \$10.40. Otter was in poor demand and sold unchanged, the range being from \$2 to \$16.

A collection of 2,500 weasel attracted fair demand, advancing about five per cent. Prices ranged from 25 cents up to 82 1/2 cents and averaged 30 cents for the skins sold.

Ordinary wolves declined about 10 per cent, ranging from \$8.25 down to \$2.75 and averaging \$5.00.—Manitoba Free Press.

Making Air Travel Popular

Sweden's Aerotransport Company Find Ways To Stimulate Business

In spite of the depression there was an increase of about 50 per cent. in the number of passengers on Sweden's continental air lines during the first six months of this year according to a statement by Captain Florman, the head of the Swedish Aerotransport Company. About 75 per cent. of the passengers are business men who are attracted by the saving of time in transit and by the safety and regularity of the aerial traffic. The former time of travel between Malmö and Paris, eleven hours, was this year brought down to seven hours, and will next year be further reduced to about five hours, thanks to the fact that luncheon will be served in the 'planes to eliminate the previous luncheon interval at Amsterdam. Other novel features are the facility for the passengers to send private radio messages while in the air and the introduction next year of special night 'planes with sleeping accommodation for the passengers.

As a further stimulant to the interest in using the air lines the Aerotransport Company has now reduced the fares of the Baltic Air Express by 25 per cent. on the Malmö-Paris stretch, so that the cost approximately corresponds to the second class railway fare.

Trade With France

Negotiations for a new trade treaty between Canada and France are expected to open shortly. Hon. C. H. Cahane, secretary of state in the Dominion Government, returns from Geneva soon, where he was Canada's delegate to the League, and it is anticipated preliminary conversations will begin then. French authorities are understood to be favorable.

Germany Buys Our Eels

The largest market for Canadian eels, states a report of the Department of Trade and Commerce, is in Germany where considerable quantities are shipped annually. A cargo of 50,000 pounds of eels, the second large shipment this season, has started the trade for the present season.

The smallest got particles have been measured at the Massachusetts Institute of Technology. It was found that 25,000 of them could be placed on the head of a pin.

Motor vehicle officials in Massachusetts are convinced that there are eight big points of difference between drivers who do not have accidents and those whose records are beset by mishaps.

They believe if all drivers could be made to realize that these eight accident factors are the primary ones, and that if they both knew what they were and how to avoid them, the traffic safety situation would be benefited enormously.

That is why they devote two months every year at the height of the travel season to the especially strict enforcement of these eight "thou shalt nots" with the idea of educating drivers as to their importance. The campaign is more, then, than a sporadic period of rigorous enforcement.

It might be interesting for the average motorist to sit down with a pencil before reading the list of mishap factors and see how many of the eight he can name and in what order he places them. They have not been selected by chance but on the basis of a thorough study of traffic mishaps over a long period of years. The list follows:

Driving too fast for conditions. Passing another vehicle going in the same direction when the view ahead is obstructed.

Failure to keep to the right of the road.

Failure to slow down for intersections.

Failure to slow down when approaching pedestrians.

Failure to observe the law regarding stopping for street cars taking on or discharging passengers.

Disregard of traffic control devices, signs, signals and stop lights. Dangerous and improper parking, as on curves and corners.

The eight points might well be taken by any motorist anywhere as his guide to an accidentless driving experience. If he were to undertake the task of self-education, it is doubtful that he could find a better point of beginning than that of learning just what careless, heedless, or reckless manifestation in traffic is likely to get him into trouble.

He could make enormous headway in improving his safety were he to realize the full meaning of only the first factor, that of driving too fast for conditions. There never has been an accident tabulation or analysis which did not rank this as the most serious breach against the canons of safe operation. Even the most liberal-minded motor vehicle officials, those who have stood for the elimination of all maximum speed limit laws, enter no demurrer to this indictment of speed.

Therefore, if the car operator wants to be safe as far as the Massachusetts eight points are concerned, his procedure is to decide to use his intelligence at all times in selecting his speed and to obey the law with respect to the other seven qualifications of a careful operator.

May Investigate Coal Prices

Canadian Fuel Board Has Been Re-Quoted To Act

The Canadian Fuel board has been requested by Hon. W. A. Gordon, Minister of Mines, to enquire into and prepare a memorandum of the facts on coal prices in Canada. Official announcement to this effect was made by the minister.

Action is being taken on recent suggestions that coal prices were somewhat high. The question engaged the attention of the senate recently when Rt. Hon. Arthur Meighen suggested the senate might undertake an inquiry into this matter.

In the senate, the question of coal prices arose when Hon. Cairine Wilson called attention to an article in a Toronto newspaper which had alleged the existence of a coal combine in British anthracite.

"I believe in love at first sight—I have experienced it myself ten times lately."—Lustige Kiste, Leipzig.

BABY'S COLDS

Never "dose" except on doctor's advice

BEST FOR ADULTS, TOO

WORLD HAPPENINGS BRIEFLY TOLD

Actual operations on the establishment of the trans-Canada chain of airfields began on November 1.

Over 50 French language weeklies in the province of Quebec have joined in formation of the "French Weekly Newspaper Association of Canada."

Over sixty per cent. of the creamery butter produced in Canada comes from two provinces, Ontario and Quebec.

Premier Benoit Mussolini appealed to the United States to cancel or reduce the European war debts in an open air address at Turin, Italy.

Practicing barrister and resident of Winnipeg, Man., for half a century, Henry Nason, 76, is dead. Born in Weston, Ont., he came to Winnipeg in 1882.

Fourteen persons were killed when a floor collapsed in a house near Giza in upper Egypt while a wedding ceremony was in progress. The bride was one of the victims.

The Alberta Government and the Dominion Administration will be asked to render assistance in a scheme to provide food control on the Bow River at Calgary.

A plaque bearing the names of 133 French soldiers who lost their lives during the siege of Yorktown 151 years ago, has been unveiled in Paris, France.

The Dowager Marchioness of Lansdowne, widow of the fifth Marquis of Lansdowne who was Governor-General of Canada from 1883 to 1888, died recently in London, England.

Judge Holman Gregory was appointed common sergeant of the City of London in succession to Sir Henry Fielding Dickens, sixth son of Charles Dickens.

The decision whether all Canadian wheat shipped to United Kingdom ports shall enjoy the six-cent-a-bushel preference or only that going direct from Canadian ports is a matter for the British Government, Hon. H. H. Stevens, Minister of Trade and Commerce, said.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver

No Calomel needed

When you feel blue, depressed, or on the edge, that's your liver which isn't pouring its daily two pounds of liquid bile into your bowels. Digestion and elimination are being slowed up, food is accumulating and dragging down you and making you feel wretched. Bile flows down like lava, oil, mineral water, inactive, cloying, or chewing gum, or anything else you can't get rid of.

You need a liver stimulant. Carter's Little Liver Pills is the best one. Safe, pleasant, reliable. Sure. Ask for them by name. Refuse substitutes. 50c. at all drug stores.

Canada's Bicycle Output

There were 18,429 bicycles manufactured in Canada in 1931. These were valued at the factories at \$485,636. Men's bicycles numbered 17,319 valued at \$458,631 and women's and children's totalled 1,110 valued at \$27,005. Bicycles manufactured in 1930 totalled 26,826 and had a value of \$706,386.

Customer—You said the tortoise I bought from you would live 300 years and it died the day after I bought it. Dealer—Now, isn't that too bad. The 300 years must have been up.

for COLDS

Head Colds, Heat Minors and Inflammation. Chest Colds and Sore Throat. Fresh, clear, rub well into affected parts.

Real relief... quickly!

MINARD'S "KING OF PAIN" LINIMENT

W. N. O. 1966

Sounds Like Magic

Press Button In High-Speed Restaurant and Food Appears

"No waiting" is the slogan of a restaurant just opened in Prague. Diners don't wait for the waiters, for there aren't any waiters to keep them waiting. As he walks through the hall of the restaurant the customer chooses his meal from gigantic menu boards hanging on the walls. Arrived at the office, he gives his order and receives a ticket with a number upon it. He then goes to the seat bearing that number.

Down the middle of the table runs a broad travelling band, and barely has he taken his place when his first dish comes bobbing along. He removes it from the band, disposes of it, and then places the empty plates and dishes upon another band beneath the table, which moves in the opposite direction. Meantime he presses a button and in a matter of seconds the next course appears. The dirty plates and dishes are carried by their hand to the washing-up department, whence yet another band takes them back to the kitchen. The price of a three-course meal is about twenty-five cents, and so well is the restaurant paying that its owner is talking of supplying another course for the same money.

Deserves The Honor

Earl Byng Earned Award Of Field Marshal's Baton

General Byng had a remarkably good record as a commander in the great war and richly deserves the field marshal's baton that has been awarded to him. The Canadian expeditionary force served under General Byng, who, after the war, became governor-general of this Dominion.

When a British soldier is given "the baton," he reaches the highest rank in the army, that of field marshal. The baton is a short staff presented by the King as a symbol of office. No one is made a field marshal unless he is of royal blood or has rendered distinguished service.

Illustrated Dressmaking Lesson Furnished With Every Pattern

3196

WHAT NEW YORK IS WEARING

(By Helen Williams)

A cunning dress for tiny maids with a big boy collar just like older sister is wearing.

To make it very practical of course, it has matching bloomers to complete it.

The fulness of the dress, falls from a brief shoulder yoke giving lots of leg space to romp about.

It's as cute as a kitten as sketched in French blue linen with white linen trim.

Spotted wool challis—red with tiny blue spots and white pique collar and trim is fetching.

Size 4 requires 2½ yards 35-inch with ¾ yard 35-inch contrasting. Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

The Loneliest Island

Cumard Liner "Carinthia" To Visit Tristan De Cunha Next Year

Weather permitting, Tristan De Cunha, loneliest island in the inhabited world, will be visited by the Cumard World Cruise Liner "Carinthia" while on her journey around the world, via the southern hemisphere, early next year.

A large quantity of food supplies will be sent ashore for the lonely islanders, and the captain of the "Carinthia" will offer a banquet to the islanders in the dining salon of the ship.

It will be imagined with what pleasure the hundred and sixty inhabitants will look forward to seeing the "Carinthia," when it is realized that more than a year sometimes elapses without a ship calling here. When a ship called two years ago to the island, the natives said they still had plenty of canned sardines, spam, salts, and Bibles. They requested poison for rats, their one mongoose being unable to make serious inroads on the hide-outs of the rodents.

Although the inhabitants frequently become depressed over the scarcity of food and long absences of ships, they always refuse to leave the island when offered land elsewhere. They are often without mail and newspapers for a long time and their food supplies are often insufficient because the soil and the sea give them poor support.

The island is the largest and the only inhabited one of a group of three, situated in the middle of the south Atlantic, and was named after a Portuguese admiral who discovered them in 1506. The main island, Tristan, is an extinct volcano, and rises 7,640 feet above the level of the sea. The crater summit is filled with fresh water. St. Helena, 1,320 miles north, is the nearest inhabited land, while Cape Town is 1,400 miles south, Buenos Aires 2,800 miles west, and the South Pole, 3,200 miles south. Until the middle of the last century the neighboring waters were visited by American whalers, but with the decline of the whaling industry these visits ceased. The whalers have been sadly missed by the Tristanites.

Five nationalities live on the island today—English, Scotch, Irish, American and Italian. They have intermarried, and of course, there are but few families named, there being four families named Glass, eight named Green, four named Rogers, two named Swain and five named Laverlie.

The only lights on the island come from lamps filled with oil made from the blubber of sea elephants.

Strange to relate, the people like poetry.

The temperature ranges from 70 degrees down to 40 degrees.

Edinburgh, the only settlement on the island, named for the Duke of Edinburgh, who visited the island in 1867, is on a plateau nine miles long and one and one-half miles wide. The settlement is 115 years old. A system of barter prevails, but there is no money.

Foreman (on excavating job)—"Do you think you are fit for really hard labor?"

Applicant—"Well, some of the best judges in the country have thought so."

FAT MAN LOSES 63 lbs.

Kruschen and Walking

Overweight men who want to lose a few pounds can have the benefit of this man's experiences. He gives them to us for publication:

In a little over twelve months I have reduced my weight from 227 lbs. to 164 lbs., by taking a dose of Kruschen Salts every morning for six months, and taking walking exercise every day. This remarkable achievement is all the more interesting to me because I did not resort to any form of dieting.

You can take off fat with Kruschen Salts if you will take one-half teaspoon in hot water every morning before breakfast, modify your diet, and exercise regularly.

While you are losing fat you will be gaining in energy—in endurance—in ambition. The old arm chair won't hold you any more—you'll want to be up and doing—you'll enjoy work and active recreation and you'll sleep like a top. You'll lose fat, and probably live years longer.

Canadian Wheat Exports

Volume Is Much Greater This Year Than Previous Season

For the first 11 weeks of the current crop year, exports of Canadian wheat totalled 53,600,000 bushels compared with 29,453,299 bushels for the same period of last year, according to a report issued by the Dominion bureau of statistics. For the week ended October 14, the total was 6,946,766. This was a decline from the previous week of nearly 1,000,000 bushels.

The following table shows the quantities exported and their channels of exportation in the first 11 weeks:

	1932	1931
Montreal ..	24,931,813	11,774,077
Vancouver ..	13,188,374	8,012,769
Churchill ..	2,738,029	Nil
Sorel ..	5,923,852	1,785,367
Quebec ..	431,371	88,326
Victoria ..	314,627	544,769
Prince Rupert ..	613	Nil
U.S. Ports	5,746,000	7,248,000

An Optical Illusion

Experience Most Drivers Have When Approaching Intersection

A car coming from the right at a street intersection will always seem to be going faster than it actually is.

This is an optical illusion produced by the action of yours and the other fellow's car arriving at the point of a "traffic wedge" at the same time. As the cars near the point of this wedge they seem to increase in speed, when as a matter of fact they may be slowing down.

When meeting a car under such circumstances it is best to be guided by the illusion and slow down accordingly, but if caught in a situation where you are too late to avoid a collision by stopping it is well to know that the other car is not travelling as fast as it seems and that you can reach the crossing safely by speeding up a little.

Paul Whiteman defines a diplomat as a man who can give his wife a \$60 washing machine and make her forget it was a \$600 fur coat she wanted.

Established just a century ago, with a strength of 100, the city of London police force now numbers 1,200, and has its own wireless receiving station and "flying squad."

+ Do You Know? +

Photograph, Canadian National Museum

THAT although practically everyone who has been in the Canadian northland has heard and seen a Looon, few have ever discovered their nesting place or seen their eggs? The photograph shows a Looon's nest with two eggs in it.

SUNDAY SCHOOL LESSON

NOVEMBER 6

THE CHRISTIAN AND WORLD PEACE

Golden Text: "Blessed are the peacemakers; for they shall be called sons of God."—Matthew 5:9.

Lesson: Psalms 22:27, 28; 67:1-7; 72:8-19; Isaiah 2:1-4; Matthew 28:18-20; Ephesians 2:13-19.

Devotional Reading: Psalm 46:1-11.

Explanations and Comments

A Vision Of The Righteous King, Psalm 72:1-7.—The Psalmist prays that the king may be so just and right that his subjects will be guaranteed justice and peace. "Some actual ruler—Solomon, Hezekiah, or Sennacherib," and Saba (west of the Red Sea). He will pity the needy and the poor, and no drop of their blood will He allow to be shed unjustly. Prayers will continually be offered for him and blessings showered upon him.

A Vision Of The Righteous Kingdom, Psalm 72:1-7.—The kingdom over which this righteous king will rule will expand until its frontiers reach the confines of the sea. Desert tribes will now before him, and his enemies will fall in humble obedience into the dust at his feet. Tribute will He receive from Tarshish—lands beyond the western sea—and from the nearer lands; gifts will be brought to him from the kings of Sheba, of Arabia, and Saba (west of the Red Sea). He will pity the needy and the poor, and no drop of their blood will He allow to be shed unjustly. Prayers will continually be offered for him and blessings showered upon him.

The sense of God was prevalent with the Hebrews in the days when these Psalms were written. They lived in the consciousness that the God of their fathers tabernacled amongst them. The same consciousness was characteristic of the great past, before materialism and wealth had entered into modern life. All the advantages of modern civilization would hardly be too much to give, if it were possible to get men to pray continually and to bless God all the day long.—F. B. Meyer.

In Our Peace, Ephesians 2:13-19.—Gentiles and Jews are now one in Christ, Paul proclaims. "Paul is thinking of the fact that the relations between Jew and Gentile, and between both Jew and Gentile and God, have been put upon a new basis by Jesus Christ. A new covenant has been made, and one of its terms is that the Gentile is to be admitted to the fellowship of God on precisely the same basis as the Jew. The death of the Messiah who effected this change was seen to play a real part in the change. It 'sealed' the covenant."—A. A. Johnston.

Pie Crust Easily Made

No Skill Required For Success With New Method

The making of a good pie crust used to be one of the criteria by which a housewife's skill was judged. Most experienced cooks will remember the anxiety with which they learned to blend shortening and shortening, and their difficulty in adding just the right amount of ice water. Since different brands have varying capacities for absorbing moisture it took experience to know by the "feel" of the pie dough when it was ready for rolling.

The filling was not as hard to make from a technical point of view, but it took time and there were plenty of "tosses" to wash afterward! Now there is a new method of making pie with crumb crusts and uncooked fillings which is being hailed with delight.

Sweetened Condensed Milk is the "magic" ingredient which makes these new pies possible. These easy combinations of pie crusts and fillings are divided into two groups; meringue pie and cream pie. The fillings in welcome from Canadian women who detect dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft ball, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floor.

And when you're through—throwaway. No duster to shake out or wash. No bother at all. The most obstinate part of household work in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous FARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you don't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

Lydia E. Pinkham's Vegetable Compound

Compound would ease that awful agony.

Mixed Marriages Not Favored By Italians

And Nearly All Weddings Are In Place Of Worship

A curious "stay home" custom still prevails among Italians with regard to marriage. There are hardly any mixed marriages. Of those who found spouses last year, 99.95 per cent. of the Catholic men married Catholic wives. Of the very small fraction who went further afield half married women of other Christian cults, and the other married wives of the Jewish faith.

Of the women, rather fewer Catholics married Protestants or Jews and only a dozen espoused men who registered as "without any religion." On the other hand 28.52 per cent. of the Jewish men married and 27.52 per cent. of the Jewish brides chose either Catholics or Protestants.

Although a purely civil marriage is now legal, about 98.88 per cent. were married in a place of public worship.

An Important Business

The making of laces, trims, and shoe findings in Canada has grown into quite an important business. The factory value of the output in 1931 was \$1,190,403. The business also turns out some interesting sidelines, not included in the above. These are alloy bowls, ten pins, duck pins, golf club heads, tongue depressors, wooden can spoons and sticks, etc. The factory value of these last year was \$21,160. There are seven factories in Quebec, two in Nova Scotia and two in Ontario.

The statue of Texas is as large as 212 Rhode Islands.

FOR COUGHS, Colds, Bronchitis, Mathieu's Syrup

DECLARE THEY HATE SIGHT OF DUST CLOTHS

Canadian women vote dust cloths a nuisance to use and to wash

MUCH PREFER APPLEFORD WONDER PAPER

With so much inventive thought being given to eliminating unnecessary household work, it is only natural that a worthwhile substitute for the dusty dust cloth should be sought.

Now it has been found! Appleford Wonder Paper which actually dusters—as it cleans—as it polishes is receiving a hearty welcome from Canadian women who detect dust cloths and all they stand for.

Wonder Paper is made from clean rags and soft paper pulp, thoroughly impregnated with a high-grade furniture polish, and absorbs dirt instead of spreading it. Appleford Wonder Paper comes in handy-size packages, twenty-five sheets, each as large as a duster. You merely crumple a sheet into a soft ball, and go over the surfaces requiring attention.

You'll be amazed at the quick and lasting finish Wonder Paper gives. When one side is worn and soiled, simply turn the Wonder Paper inside out. After the furniture or woodwork has been gone over, you can still use your Wonder Paper on the floor.

And when you're through—throwaway. No duster to shake out or wash. No bother at all. The most obstinate part of household work in half the time and with half the effort. Doesn't the idea appeal to you?

Special Offer

Wonder Paper is made by the makers of the famous FARA-SANI heavy waxed paper in the Green Box. Most grocery, hardware and department stores sell Appleford Wonder Paper. If you don't, just send the coupon and we'll give you a new and unique booklet entitled "Leftovers," containing one hundred recipes, as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25c for which please send me one full-size package of WONDER PAPER and your 100 recipes for "Left-overs."

THE HOUSE OF DREAMS-COME-TRUE

—BY—

MARGARET FIEDLER
Author of
"The Splendid Fairy" and "The Harms of
Hodder & Stoughton, Ltd., London.

CHAPTER XXXVI.—Continued

Both girls had their "premiers de danseurs" served to them in their rooms, so that each one's morning mail was an unknown quantity to the other until they met downstairs.

"From Lady Anne?" Jean looked interested. "What does she say?"

"She says—she writes—"

Here Claire floundered and came to a stop as though uncertain how to proceed, the little puzzled frown deepening between her brows. "Oh, Jean, she had a special reason for writing—some news—"

Jean's arm, hanging slackly at her side, jerked suddenly. Something in Claire's half-frightened, deprecating air sent a thrill of foreboding through her. Her heart turned to ice within her.

"News?" she said in a harsh, strangled voice. "Tell me quick—what is it? . . . Blaise? He's not—dead?"

Her face, drained of every drop of colour, her suddenly pinched nostrils and eyes stricken, with quick fear drew a swift cry from Claire.

"No—no!" she exclaimed in hasty reassurance. "It's good news! Good—not bad!"

Jean's taut muscles relaxed and she leaned against the wall as though seeking support.

"You frightened me," she said dully. "Good news? Then it can't be for me. What is it, Claire? Is Nick?"

SITUATION VACANT—FEMALE

LADIES WANTED TO DO LIGHT sewing at home; good pay; work sent charges paid. National Manufacturing Co., Dept. 84, Montreal.

MEN—WOMEN—WANTED

Wonderful opportunity. Ambitious beginners wanted in hairdressing, permanent waving, hairdressing, auto engineering, electricity, auto-mechanics, chauffeurs, aviation, radio, etc. Literature free. W. N. U. 1906

dead, and de Chassaigne dying. He had just strength enough to confide in Blaise all that I have written. I am writing to you, because I think it might come as too great a shock to Jean as you say she is still so far from strong. You must tell her—"

Jean interrupted the reading, with a shout of laughter.

"Oh, Claire! Claire! You blessed infant! I suppose all those preliminary remarks of yours about 'a letter from Lady Anne' and the 'news' it contained were by way of preparing me for the shock—'breaking the news' in fact?"

"Yes," admitted Claire, flushing a little.

Jean rocked with laughter—gay, spontaneous laughter such as Claire had not heard since from her lips since the day when Madame de Varigny had come to Staple.

"And you just about succeeded in frightening me to death!" continued Jean. "Oh, Claire, Claire, you adorable little goose, didn't you know that good news never kills?"

"I didn't feel at all sure," returned Claire, laughing a little, too, in spite of herself. "You've looked lately as though it wouldn't take very much of anything—good or bad—to kill you."

"Well, it would now," Jean assured her solemnly. "Not all the powers of darkness would prevail against me, I verily believe." She paused, frowning a little. "How beastly it is, though, to feel outrageously happy because someone is dead! It's indecent. Poor little Nesta! Oh, Claire! Is it hateful of me to feel like this? Do say it isn't, because—because I can't help it!"

"Of course it isn't," protested Claire. "It's only natural."

"I suppose it is. And I really am sorry for Nesta—though I'm so happy myself that it sort of swamps it. Oh, Claire darling!—the shadow passing and sheer gladness of soul bubbling up again into her voice—"I'm bound to kiss someone—at once. I'll have to be you! And look! Those two may be here any moment—Lady Anne said so. I'm going to make myself beautiful—if I can. I wish I hadn't grown so thin! The most ravishing frock in the world would look a failure draped on a clothes-horse. Still, I'll do what I can, to conceal from Blaise the hideous ravages of time. And I'm not going to wear black—I won't welcome him back in sackcloth and ashes! I won't! I won't! I've got the darlingest frock upstairs—a filmy grey thing like moonlight. I'm going to wear that. I know—I know—softly—"that Glyn would understand."

And if he knew anything at all about it—and one would like to think he did—it is quite certain Peterson would have approved his daughter's decision. For to his incurably romantic spirit, the idea of a woman going to meet her lover of whom a malign fate had so lately robbed her altogether, died in the noble habitude with which she had paid full tribute to her father's death, would have appeared of all things the most incongruous and irreconcilable.

So that when at last a prehistoric vehicle, chartered from the Inn of the Green Dragon in the village below, tolled slowly up the hill to Beinfels and Blaise and Nick climbed down from its musty interior, a slender moon-grey figure, which might have been observed standing within the

shadow of a tall stone pillar and following with straining eyes the small-like progress of the old-fashioned carriage up the steep white road, flitted swiftly back into the shelter of the house. Claire, dimpling and smiling at the great gateway of the castle, alone received the travellers.

"Go along that corridor," she said to Blaise, when they had exchanged greetings. "To the end door of all. That's the sun-parlour. You'll find Jean there. She thought it appropriate"—smiling at him.

Then, as Blaise strode down the corridor indicated, she turned to Nick and asked him with an adorable coquetry why he, too, had come to Beinfels?

"I've heard it is the House of Dreams-Come-True," replied Nick promptly. "It seemed a likely place in which to find you, most beautiful."

Claire beamed at him.

"Oh, am I that—really, Nick?"

"Of course you are. The most beautiful in all the world. Claire"—tucking his arm into hers—"tell me, how is the 'soul-rebuilding' process getting on? that's why I came, really, you know, to find out if you had completely finished redecorating your interior—I can vouch for the outer woman myself—with an adoring glance at the fluffy ash-blond hair and pure little Grouse profile."

Claire rubbed her cheek against his sleeve. To a woman who has been for four months limited almost exclusively to the society of one other woman—the rough 'feel' of a man's coat-sleeve (more particularly if he should happen to be the man) and the faint fragrance of tobacco which pervades it form an almost delicious combination.

Claire hauled down her flag precipitately.

"I'm ready to go back to England any time now, Nick," she murmured. "Are you? Darling! How soon can you be ready? In a week? Tomorrow? Next day?"

"Quite soon. And meanwhile, while you—you and Blaise—stay for a bit at the Green Dragon?"

"We might," replied Nick solemnly, quite omitting to mention that something of the sort had been precisely their intention when leaving England.

Meanwhile Blaise had made his way to the door at the end of the corridor. Outside he paused, overwhelmed by the sudden realization that beyond that wooden barrier lay holy ground—Paradise! And the Angel with the flaming sword stood at the gate no longer. . . .

She was waiting for him over by the window, straight and slim and tall in her moon-grey, her hands hanging in front of her tight-clasped lips of those of a child. But her eyes were woman's eyes.

Travellers' Taste In Fiction Has Changed

Murder and Mystery Stories Are Most in Demand

When people go travelling now days they want murder and mystery stories instead of love stories to help them while away the time according to Martin Bahr, proprietor of a book store in a railway station at Detroit.

"I used to sell a lot of stories about men meeting pretty girls and falling in love, but that was two or three years ago," he said. "Now they want two or three murders in their books, or else western stories, which are next in popularity."

The books on astrology, so popular a few years back, are seldom asked for, according to Bahr. Likewise, there is little demand for the souvenirs bought avidly a few years ago.

Britain's Oldest Woman

Never Could Be Persuaded To Disclose Her Age

Mrs. Arabella Bridgman, who has just died at The Laurels, Clewer, Windsor, at the age of 106, was believed to be the oldest woman in Britain—but she never admitted it.

She refused to put her age on any document—even the census paper—and she would not fill up income tax forms.

She had lived at The Laurels for more than 30 years, but she always refused to have gas or electricity in the house, which was lit by candles.

Might Help a Little

One wonders if perhaps German equality and French security would be helped on a bit if "Deutschland Uber Alles" and "La Marseillaise" were replaced with songs breathing a little less nationalism and not quite so much martial ardor.

The port of Vancouver has the largest ocean grain elevator accommodation in the world.

MORNING AFTER

Made in Canada

● Eat, drink, and be merry! No need to feel "sunk" next day. Take a laxative dose of Phillips' Milk of Magnesia when you go to bed, or with your breakfast orange. It rids stomach and bowels of all lingering poisons. No headaches. No nausea. Not even a coated tongue. Get the genuine Phillips' Milk of Magnesia; substitutes are not the same.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

Virgin Rock Seldom Seen

Phenomenon On Nova Scotia Coast Usually Obscured By Fog

The coastline of Nova Scotia is well known for its rugged splendor. Twisting and turning in almost endless variety, it provides quiet harbors and coves, as well as points where surging seas rage futilely against impregnable rock. Down through the centuries one of the coastal attractions has existed near this village.

A mile from Prospect, out on Burnt Island, where the breakers expend their greatest force, lies the Virgin Rock, so named because of its remarkable resemblance to the Virgin and Child. Ages of erosion have formed the great rock into the shape of a woman's head and shoulders and the head and shoulders of a child.

Occasions when the phenomenon may be seen are rare, due to weather conditions, and comparatively few persons, including residents of Prospect, have had a good view of the Virgin Rock. With a heavy sea running, an approach to the rock is impossible, and when the water is smooth, fog is likely to obscure the view.

Locate Submarine Mountain In Pacific

More Than One Mile High Opinion Of Surveyors

A huge submarine mountain, more than a mile high, has been discovered in the ocean 50 miles west of Santa Cruz, California, by the crew of the geodetic survey boat "Guide," which has been making soundings near here.

A huge crater, 7,000 feet deep, was located some time ago. The top of the mountain is approximately 800 fathoms, or 5,400 feet, under the surface.

Edible bird nests are being gathered in Java and the Philippines for export to China.

The average weight of an elephant is about five tons.

Little Helps For This Week

"Now the God of patience and consolation grant you to be like-minded one toward another, according to Christ Jesus."—Romans xv. 5.

"Let patience have her perfect work."—James i. 4.

Make me patient, kind, and gentle Day by day; Teach me how to live more nearly As I pray.

—Sturges' Magazine.

The exercise of patience involves a continual practice of the presence of God; for we may be come upon at any moment for an almost heroic display of good temper, and it is a short road to selfishness, for nothing is left to self. All that seems to be most intimate, to be self-private property, such as time, home, and rest, are invaded by these continual trials of patience. The family is full of such opportunities.—F. W. Faber.

Persian Balm is magical in creating alluring complexions. A little gentle rubbing and your skin is invigorated and touched with the true beauty of youth. Charming fragrance. Delightful to use. Cools and caresses the skin. Relieves all roughness and chafing caused by weather conditions. Tones and stimulates. Enhances and protects the loveliest complexion. Universal as a perfect aid to beauty and charm.

English Language Used

All signs on Japanese ships are in English—even the signs on the bridge which is never occupied by anybody but Japanese. The menu is printed in English only, not Japanese, even on ships which never run into an English-speaking port.

"Animals do not know what it is to be superstitious," declares a clergyman. But we have yet to hear of the mouse that will pass a white cat on the stairs on a Friday.

One of the most beautiful sights in the Hawaiian Islands is the moonlight rainbow.

Britain Refuses to Pay Fuel Oil Tax, 1932--Regulations as to Refund of Tax

(By George Hambleton, in Calgary Herald.)

London, Nov. 1.—An amendment moved by Sir J. Sandeman Allen, member of the Union government, asking that grain consigned from a United States port and certified by the Canadian government officer to have been grown in Canada should be entitled to the Imperial Conference preference was defeated 247 to 55.

Hore - Belisha, government spokesman, declared the government had two reasons for refusing the amendment, firstly because the customs procedure would make it extremely difficult to identify the wheat, and secondly on the grounds of policy.

It had always been a matter of policy, declared Hore-Belisha, to insist that goods which were to enjoy the preference must not only be grown in the Empire, but must be consigned from an Empire country.

"It is our purpose to encourage the storage of wheat which is to obtain the preference either in Canada, or in the United Kingdom, where we may obtain an advantage of the storage and warehouse dues," added Hore-Belisha.

PEYTON NEWS

On Saturday, October 22nd, the residents of Peyton community gathered together for a harvest supper which was held in Peyton school. Mrs. G. Hutchison, Mrs. O. Rudy and Miss E. Warren were the joint hostesses of the occasion. After the excellent supper had been served the remainder of the evening was spent in cards and dancing. All present report a most enjoyable time.

The Harvest Festival of the Anglican church held in the Peyton school on Sunday, Oct. 23rd, was well attended.

CROCUS LODGE, No. 115, A.F. & A.M.
meets at 8 p.m. on Wednesday or after full moon. Visiting brethren cordially welcomed.
W. S. LEE, W.M., J. W. LAWRENCE, Sec.

Section I of the above Regulations reads:

"Every application for a refund in respect of the tax paid must be made within six months of the delivery of the fuel oil in respect of which a refund is sought."

The effect of this section has been modified to the extent that applications for refund on gasoline sold before the coming into effect on May 2nd, 1932, of the above Act must be made on or before September 15th, 1932, and shall not be considered if received later than that date.

We take pleasure in advising you of the above ruling. If we can be of any assistance to you in completing your applications consider any of our representatives at your service

REARVILLE SCHOOL REPORT

Grade X, Isabel Crawshaw, 66.15.

Grade VII, Harold Robinson, 75.5; Phyllis Wilton, 75.15.

Grade IV, Marjorie Robinson, 73.2.

Grade II, Stanley Wilton, 72.5.

Grade I, Elbert Robinson, 70.4.

Harold Robinson won the book for the highest average for September and October.

—E. W. Dunn, Teacher

The Lucky Karma Winner.

The Candle Contest at the Chinook Hotel came to a close at 12 o'clock noon on Monday, October 31st. The actual time the candle burnt was 62 hours, 18 minutes and 22 seconds.

The nearest guess to this came from Aza Senecal, of Rearville, Alberta, and who is the winner of that beautiful lucky jewel, the Karma Mascot, and whose guess was 62 hours, 35 minutes and 10 seconds; the second nearest was Agnes Bruston with 63 hours, 5 minutes and 20 seconds; and the third nearest came from R. D. Vanhook with 63 hours, 43 minutes and 23 seconds.

Collholme News.

Elmer Spreeman and Ruth Campbell left for Red Deer on Wednesday to attend the Northern Bible College during the winter months. Ewart Duncan expects to follow later.

The W. M. S. will hold their regular monthly meeting on Nov. 3rd at the home of Mrs. N. D. McKinnon.

Mr. and Mrs. W. Elder, Nora and Ruth Lynn, were dinner guests at the Duncan home on Sunday.

Thought They Were Married People.

Fair Parishioner—"I enjoy your sermons. I always learn something from them."

Minister—"I'm glad to hear that."

Fair Parishioner—"Yes indeed. For instance, until your sermon this morning I'd always thought Sodom and Gomorrah were man and wife."

M. L. CHAPMAN, Chinook

GOVERNMENT OF THE DOMINION OF CANADA 4% LOAN—1932

The Minister of Finance offers for public subscription

\$80,000,000

Dominion of Canada 4% Bonds

Bearing interest from 15th October, 1932, and offered in two maturities, as follows:

\$25,000,000—3 YEAR 4% BONDS, DUE 15th OCTOBER, 1935

\$55,000,000—20 YEAR 4% BONDS, DUE 15th OCTOBER, 1952

Subject to redemption at par and interest on or after 15th October, 1947

Principal payable without charge, in lawful money of Canada, at the office of the Minister of Finance and Receiver General of Canada at Ottawa or at the office of the Assistant Receiver General at Halifax, Saint John, Charlottetown, Montreal, Toronto, Winnipeg, Regina, Calgary and Victoria.

Interest payable half-yearly, 15th April and 15th October, in lawful money of Canada, without charge, at any branch in Canada of any Chartered Bank.

Denominations:

3 YEAR BONDS, \$1,000

20 YEAR BONDS, \$500 AND \$1,000

The proceeds of this Loan will be used to retire \$34,449,950 of bonds maturing 1st November, 1932, and to provide for the general purposes of the Government and the Canadian National Railways.

The Loan is authorized under Act of the Parliament of Canada, and both principal and interest are a charge on the Consolidated Revenue Fund of Canada.

The amount of this issue is \$80,000,000. The Minister of Finance, however, reserves the right to allot or reject the whole or any part of subscriptions received, provided such allotments do not increase the principal amount of the issue by more than \$25,000,000.

Applications will not be valid on forms other than those printed by the King's Printer.

ISSUE PRICE: 3 Year Bonds, 99.20 and interest, yielding to maturity 4.28%
20 Year Bonds, 93.45 and interest, yielding to maturity 4.50%

Payment to be made in full at time of application or in the case of the 3-year bonds, on allotment.

Subscription lists will open on 31st October, 1932, and will close on or before 16th November, 1932, with or without notice, at the discretion of the Minister of Finance. Subscriptions will be received by any branch in Canada of any chartered bank and by recognized dealers from whom official application forms may be obtained.

DEPARTMENT OF FINANCE,
Ottawa, 31st October, 1932

Heard Around Town

The Acadia Produce have a full line of men's and boys' Fleece Combinations, Rubbers and Overshoes, Mitts, Gloves, Windbreakers, Black Sweaters. And arriving this week: Slippers for the family, Fancy Goods for Xmas and China.

The Ladies' Club Card met on Tuesday evening at the home of Mrs. L. Robinson. The prize-winners were Mrs. Murray and Miss Fay Robinson.

The Ladies' Aid will be held on Wednesday, Nov. 12th, at the home of Mrs. Todd.

The Women's Institute met Wednesday afternoon at the home of Mrs. E. E. Jacques with Mrs. Otto and Mrs. H. Lloyd as joint hostesses. The meeting was opened by the president, after which the secretary gave the report of relief work done during the month of October. A number of the members met at the church two weeks ago, where they did sewing for small children. They also met last week at the home of Mrs. Richard Stewart, when they made a quilt. The wool for same was donated by Mrs. Lorne Proudfoot. It was decided to ask for a demonstration on interior house decorations from the Department. Mrs. J. Bayley was in charge of the programme, which position she

ably filled. The first on the programme, was to have been a speech by Lorne Proudfoot, M. L.A., on 'Legislation,' but owing to the illness of Mrs. Proudfoot he was unable to be present which was a great disappointment to all. Mrs. Nelson Murray gave a very fine paper which was very much appreciated. Miss Norma gave two piano solos which added greatly to the evening's enjoyment. Final arrangements were made for the Masonic banquet to be held Thursday (tonight) Mrs. Bayley had prepared a contest, which had to be omitted as the banquet arrangements took up the time. Mrs. Bayley had intended giving a beautifully decorated chicken, but when the contest did not come off the fowl was presented to Miss Norma Hurley.

Mrs. Gertrude Thompson is visiting for a week or two with her son William in Stimpson S.D.

Mrs. Lorne Proudfoot underwent an operation at the Cerebral hospital on Wednesday and is doing as well as could be expected.

Don't forget the Young People's Society meeting next Wednesday evening at the church. All young people over fifteen invited—not necessary to be a resident of Chinook. Come and have a good time. The committee has a surprise for you.

The Chinook Hotel Halloween Dance

Chinook enjoyed the most peaceful Halloween in its history, and no doubt the credit is due to Captain Peters who gave a free dance in the Chinook Hotel Ballroom for all the children on condition that no disturbance or foolishness was to take place during the evening. Captain Peters also requested the councilmen to maintain adequate police protection so ratepayers' property would not be damaged or molested. The outcome was a real sane Halloween, which was much appreciated by Chinook residents—no damage reported, and the young folks behaved splendidly.

You Can't Trust Strangers.

The day before she was to be married the old negro servant came to her mistress and entrusted her savings to her keeping. "Why should I keep it?"

thought you were going to get married," said the mistress.

"So I is Missus, but do you s'pose I'd keep all dis money in de house wid dat strange nigger?"

If your nose is close
To the grindstone rough
And you hold it down there
long enough,
In time you'll say
There's no such thing
As brooks that babble
Or birds that sing;
These three will all
Your world compose—
Just you, the stone and
Your darned old nose.

WANTED—The news from every part of the Chinook district. Send it in.
